

SAFETY OFFICER REPORT

Now that spring is here and most of us have been able to get out and start riding, (it's still not good riding weather here in northern Wisconsin) hopefully everyone did a good T-CLOCS on their bike.

Make sure you take some time to find an empty parking lot to practice some of your perishable skills that are rusty from not riding. Practice doing some slow speed maneuverers, swerves, and quick stops.

Spring is also a good time to check over all your gear and make sure it's ready for the upcoming riding season.

We all had time to think about taking that riding class you've thought about doing, now is a good time to sign up for it and work on reviewing old skills and learning some new ones.

Ride so the mistakes of others don't affect you!

Ride with Pride,

Mike Murray
GLRC Safety Officer
